PROFESSIONAL SUMMARY

Self-motivated cybersecurity professional with hands-on expertise in penetration testing, SS7 vulnerability research, web application security, and SOC operations. Successfully identified and reported a High severity privacy vulnerability on Temu via HackerOne (Report #3601420, CVSS 7.5). Completed Certified Penetration Tester (CPT) at Qnayds Academy covering networking fundamentals, web application hacking, wireless network testing, system hacking, and social engineering. Ranked Top 25% on TryHackMe globally. Built multiple security tools from scratch: SS7Shield, SecureHawk Pro, UserHawk, and BugScout. Active bug bounty researcher on HackerOne targeting OPPO and Temu platforms. Backed by 6+ years of technical operations experience.

CORE COMPETENCIES

Threat Detection & Monitoring | Vulnerability Assessment | OWASP Top 10 | SS7 Protocol Security
Web Application Hacking | Wireless Network Testing | System Hacking | Social Engineering
Bug Bounty & Responsible Disclosure | CVSS v3.1 Scoring | Incident Documentation
Networking Fundamentals | GDPR / Privacy Law | Photo Forensics | Security Report Writing
Log Analysis (Wazuh / Splunk) | Network Packet Analysis | OSINT & Reconnaissance

TOOLS & TECHNOLOGIES

SIEM & Log Analysis: Wazuh (Log Reading & Analysis) | Splunk
Vulnerability Scanning: Nessus | Burp Suite (Repeater, Collaborator, Intruder)
Network Analysis: Wireshark | Nmap | theHarvester | Maltego
Exploitation & Attack: Metasploit | SQLMap | Stormbreaker
OSINT & Recon: Sherlock | Maltego | theHarvester | Apify
Forensics: Photo Forensics | Metadata Analysis | Steganography
Version Control: Git | GitHub (Web Interface & CLI)
Development: Python | HTML | Flutter (Android App Development)
Platforms & Labs: HackerOne | TryHackMe | PortSwigger Web Academy | Kali Linux

SECURITY PROJECTS & TOOLS BUILT

SS7Shield | Python CLI Security Tool

2026

- CPT final project — SS7 vulnerability assessment, SMS 2FA testing, SIM swap detection
- 23 automated security checks across 3 domains: SS7 protocol, application 2FA, SIM swap risk
- Modules: vulnerability_scanner.py | sms_2fa_tester.py | sim_swap_detector.py | report_generator.py
- Generates professional HTML and TXT SOC reports with risk scoring and remediation guidance
- Built with Python, colorama, requests | Project Guide: Alan Jolly | Qnayds Academy
- Repository: github.com/muhammed95rafi-arch/ss7shield

SecureHawk Pro | Python CLI + Web Security Scanner

2025-2026

- Full web security scanner with 10 live check modules: SSL/TLS, CORS, XSS, SQLi, security headers
- Additional checks: DNS, cookies, rate limiting, sensitive path probing, info disclosure
- Optional Claude AI deep analysis integration for enhanced vulnerability reporting
- Upgraded from demo mode to live scanning with real HTTP request analysis

- Repository: github.com/muhammed95rafi-arch

UserHawk | Python CLI Username Enumeration Tool

2025

- Username enumeration tool covering major platforms — inspired by Sherlock
- Multi-platform search with concurrent requests for fast enumeration
- Includes custom username wordlist generator for targeted OSINT reconnaissance
- Repository: github.com/muhammed95rafi-arch

BugScout v2.0 | HTML Bug Bounty Recon Tool

2025

- Single-file HTML tool with 35+ vulnerability checks across web, mobile, and AI/LLM categories
- Covers reverse engineering, prompt injection, Account Takeover, and Host Header Poisoning
- Built-in Markdown security report generator for professional bug bounty submissions
- Repository: github.com/muhammed95rafi-arch

BUG BOUNTY RESEARCH — HACKERONE

Active Bug Bounty Researcher | HackerOne

2024 — Present

- Discovered High severity Privacy/Information Disclosure on Temu.com — Report #3601420, CWE-200, CVSS 7.5
- Identified publicly exposed purchase history of millions of users accessible without authentication
- Prepared professional report with CVSS v3.1 scoring, PoC screenshots, and remediation recommendations
- Active research on OPPO platforms: id.oppo.com and open.oppomobile.com
- Findings include: HTTP 500 errors, internal header disclosure, missing security headers, Clickjacking PoC
- Core workflow: Burp Suite Repeater + Collaborator | Nmap | PortSwigger Web Academy techniques
- Followed full responsible disclosure process per HackerOne guidelines and OWASP standards

CERTIFICATIONS & TRAINING

Certified Penetration Tester (CPT) | Qnayds Academy

2025 — 2026

- Project Guide: Alan Jolly | Submission Date: April 5, 2026
- Networking Fundamentals | Vulnerability Assessment | System Hacking
- Web Application Hacking | Wireless Network Testing | Social Engineering

TryHackMe — VISIONARY Rank [0x5] | TryHackMe

2024 — Present

- Global Rank: Top 25% | 7 Rooms Completed
- Hands-on training: SOC fundamentals, network security, web app attacks, Linux basics

PortSwigger Web Security Academy | PortSwigger

2024 — Present

- Completed: Path Traversal, SQL Injection, XSS
- In Progress: SSRF — Server-Side Request Forgery

HackerOne Bug Bounty Researcher | HackerOne

2024 — Present

- Active researcher — Verified High Severity finding (CVSS 7.5) on Temu.com
- Self-study: OWASP Top 10, SOC Fundamentals, Web Application Security, CVSS Scoring

WORK EXPERIENCE

Esko CDI Flexo Digital Imaging Operator | Zincograph

2018 — Present

- Operate Esko CDI Spark 5080 computer-to-plate digital imaging system in flexographic printing
- Manage digital workflows, diagnose technical issues, maintain detailed operational logs
- 6+ years of technical reliability, precision, and systematic problem-solving

Mobile Technician — Hardware Repair | Freelance

2015 — 2018

- Component-level hardware diagnostics and repair on mobile devices
- Systematic root cause analysis and technical documentation

EDUCATION

Bachelor of Commerce (B.Com) | Rabindranath Tagore University (RNTU)

Graduated 2026

LANGUAGES

English (Professional) | Malayalam (Native) | Hindi (Proficient) | Arabic (Basic)
